

The New Photo-Miniature Volume 8, PT. 1, Nos. 85-90 (Paperback)

By John A Tennant

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1908 Excerpt: .up to the necessary density. To intensify: Make a solution of mercuric chloride, 300 grains in 10 ounces of water, and add dram of hydrochloric acid. Bleach in this solution and blacken in a solution of strong ammonia water, 20 drops; water one ounce. Allied to fog, in the eccentricity of its neven incidence, is the defect known as uneven density: that is, the reduced silver appears in irregular patches of varying thicknesses. A thin end, side, or corner of a negative may be caused by the unevenness of the sensitive emulsion; patches of less density may be due to the quantity of the developer used being too small; or by the dish not being properly level; or by carelessness in pouring on the developer, the thinner parts being places which were only partly covered by the developer and therefore less reduced. The solution acts in...

Reviews

Extremely helpful for all class of folks. It is really simplified but excitement from the 50 percent of your ebook. You wont sense monotony at at any moment of your time (that's what catalogs are for about if you check with me).

-- Prof. Zachary Pollich V

This publication will never be straightforward to get going on looking at but really fun to see. This can be for all those who statte that there had not been a worth looking at. You wont really feel monotony at at any moment of your own time (that's what catalogs are for about should you request me).

-- Cale Hansen Sr.
