There is a defective valve in flushing tank in closet No. 8, which prevents refilling of tank. The walls in toilet rooms, boys and girls sides, are slightly damp. Attention is invited to the following statement: Schoolrooms. It will be observed that there is a deficient amount of air space in all rooms except the southeast room, first floor (which is used as a kindergarten), when said air space is computed according to the number of desks in each room. The following table shows the air space for each pupil according to enrollment. As the enrollment changes from month to month, this factor is subject to constant change. It will be noted that there is a deficiency in air space in six of the nine rooms. The relative humidity, as usual, is too low. The temperature record presents a most satisfactory condition, being remarkably uniform in all rooms, and of the proper degree. Kindergarten, no desks. 6 No desks, 1 long table. In four of the rooms the supply of fresh air falls below the requisite 30 cubic feet per minute, when estimated according to the number of desks, the deficiency being most marked in the northwest room, second floor. According to enrollment there is a deficient supply of air in three rooms only, again being most marked in the northwest room, second floor. In the southwest rooms, first and second floors, the deficiency is not great, and is probably made up in...
