Bulletin - United States Geological Survey Volume 471 (Paperback)

By Geological Survey

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1912 Excerpt: . the east side of Cottonwood Creek in sees. 19, 30, and 31 (Nos. 256, 259, 261, and 268), but no trace of it was found along Dry Creek. The bed ranges in thickness from 3 feet 4 inches to 4 feet 6 inches, and averages 3 feet 10 inches. The location of the outcrops of this bed was determined in most places from exposures of the lignite and where these were lacking from the slag that had resulted from the burning of the bed. Bed F is exposed in the west half of the township, where it is variable in thickness and probably is in some places represented only by carbonaceous clay. The greatest thickness measured is 7 feet 7 inches in the E. J sec. 31 (No. 257), and the least 1 foot 8 inches, near the northwest corner of sec. 8. Northward from...

Reviews

An incredibly great ebook with lucid and perfect explanations. It is actually rally fascinating through studying period of time. It is extremely difficult to leave it before concluding, once you begin to read the book.
