RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 94 pages. Original publisher: Silver Spring, Md. : U. S. Dept. of Commerce, National Oceanic and Atmospheric Administration, National Ocean Service, 2008 OCLC Number: (OCLOC)403730259 Subject: Coral reef ecology -- United States. Excerpt: . . . assessment ( risk models that link alternative decisions to future conditions ) provides a systematic means to improve an understanding of the causal chain of events, identifying factors on a quantitative basis for informed management decisions ( Suter 2006 ) and a logical, systematic approach to understand the complexities of disease.

Investigations require astute observations and critical thinking drawing on many disciplines and types of information to develop quantitative comparisons among groups and various factors. The synthesis of this information can then be used to solve one of three basic problems: causation, significance or control ( Wobeser 1994 ). Our goal in studying coral disease is conservation of our worlds reefs, but to do this we must be able to: Describe new diseases Determine causation Identify the source of current outbreak Determine risk factors and conduct risk analysis for informed decision making Implement disease-specific surveillance measures Evaluate existing prevention control measures Reduce...
