Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: French . Brand New Book ***** Print on Demand *****.Excerpt from Metrology: Address Delivered Before The Literary And Scientific Society, March 22, 1901 By the Imperial Act of 1824, the standard yard of 1760 and the brass Troy pound of 1758, of 5,760 grains were made the units of measure, and declared to be the only original and genuine standards, from which all other Imperial weights and measures were to be derived. The former were destroyed by the burning of the Houses of Parliament in 1834. In the Act of 1824, referred to, a provision, based on scientific principles, but in this case unpractical, was made for the contingency of loss of the original standards. From experiments made, it was found that a cubic inch of distilled water, at 62 F., barometer at 30 inches, weighed 252.458 grains; and also that a pendulum vibrating seconds of mean time in the latitude of London, in a vacuum at the level of the sea, measured 39.1393 standard inches. Theoretically it was therefore comparatively simple, to find the length of a standard inch (hence yard) by means of a pendulum. Having a standard inch, the cubic inch would follow by its equivalent in water of 252.458 standard grains, and hence means obtained for the restoration of the standard Troy pound. However, when it became necessary after 1834 to obtain some material standards for again legalizing, the scientific men of the day decided upon furnishing the same by comparison with copies of the original (1824) standards, - and then, by Act of Parliament making such prepared measures the standards. By the Act of 1855, the Imperial pound (avoirdupois) of 7,000 grains was substituted for the former standard Troy pound of...
