

Design and Development of a Cpci-Based Electronics Package for Space Station Experiments

Filesize: 8.14 MB

Reviews

*The ebook is simple in read easier to recognize. It is one of the most awesome book we have read through. I am happy to explain how this is basically the finest pdf we have read inside my very own lifestyle and may be he finest publication for actually.

DESIGN AND DEVELOPMENT OF A CPCI-BASED ELECTRONICS PACKAGE FOR SPACE STATION EXPERIMENTS

To save **Design and Development of a Cpci-Based Electronics Package for Space Station Experiments** PDF, please access the web link listed below and download the document or have accessibility to additional information that are highly relevant to DESIGN AND DEVELOPMENT OF A CPCI-BASED ELECTRONICS PACKAGE FOR SPACE STATION EXPERIMENTS book.

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 24 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. The NASA John H. Glenn Research Center is developing a Compact-PCI (CPCI) based electronics package for controlling space experiment hardware on the International Space Station. Goals of this effort include an easily modified, modular design that allows for changes in experiment requirements. Unique aspects of the experiment package include a flexible circuit used for internal interconnections and a separate enclosure (box in a box) for controlling 1 kW of power for experiment fuel heating requirements. This electronics package was developed as part of the FEANICS (Flow Enclosure Accommodating Novel Investigations in Combustion of Solids) mini-facility which is part of the Fluids and Combustion Facility s Combustion Integrated Rack (CIR). The CIR will be the platform for future microgravity combustion experiments and will reside on the Destiny Module of the International Space Station (ISS). The FEANICS mini-facility will be the primary means for conducting solid fuel combustion experiments in the CIR on ISS. The main focus of many of these solid combustion experiments will be to conduct applied scientific investigations in fire-safety to support NASA s future space missions. A description of the electronics package and the results of functional testing are the subjects of this report. The report concludes that the use of innovative packaging methods combined with readily available COTS hardware can provide a modular electronics package which is easily modified for changing experiment requirements. This item ships from La Vergne, TN. Paperback.
